

SURETY

A shared success

As an insurance and reinsurance company, our focus is not so much on shareholders and stock markets as on policyholders and partners. Much of our time is dedicated to understanding your clients' markets to better understand their insurance needs. Our work involves a thorough analysis of your client's risks, supported by in-depth knowledge of the sector in which they operate. Our integrated policy management, claims, and risk analysis teams can offer creative risk transfer solutions.

Surety Bonds Offering

General Union Insurance is an authorized surety provider and a market leader in the construction, engineering, and service sectors, supporting both public and private projects across the EMEA region (Europe, Middle East, and Africa), Latin America, and emerging markets in Asia. Our goal is to provide clients with a competitive advantage through tailored surety solutions that support the tender, execution, and post-completion phases of major construction, engineering, and infrastructure projects worldwide. General Union Insurance requires each risk to be backed by counter-guarantees customized to the specific needs of each project.

General Union Insurance adds value by mitigating risk through independent Inspection Reports, prepared by third-party entities unaffiliated with either the Beneficiary or the Contractor. These reports provide an additional layer of insight into ongoing project performance and help identify potential defects or changes that may be required by the Beneficiary to ensure the project is completed successfully.

We issue guarantees for both public and private contracts, backed by a team with decades of experience in the world's leading surety markets.

Our core Bonds product offering, with significant capacity available, includes:

- Bid
- Performance
- Advance
- Payment
- Wages Payment
- Maintenance
- Concession
